

Art Pathway Spring 2 2023

Throughout this year, both KS3 and KS4 students will be developing observation and creative skills by drawing and creating collage with different types of materials. Students will be building on skills and different recording techniques, focusing on pencil tone, primary colours being mixed to make their own colours, different materials having different textures and also recycling materials which can be used to create art. Pupils will also research different artists from all over the world. For their final outcome the students can discuss their art work and artists who they prefer or admire.

By the end of the year the students should be able to name a few artists and what kind of art materials they prefer to work with. They will also have the following knowledge:

- Name some formal Art elements
- Describe pencil tone
- Name the Primary colours
- Articulate their knowledge and research of different artists around the word
- Describe and explain how to use resources effectively (such as watercolours).
